EDUCATION CONFERENCE ON ONE HEALTH FOR FOOD SAFETY, AGRICULTURE, AND ANIMAL HEALTH

ABOUT UC DAVIS

OUR STORY

UC DAVIS

UC Davis is the home of the Aggies — go-getters, change makers and problem solvers who make their mark at one of the top public universities in the United States.

Since we first opened in 1908, we've been known for standout academics, sustainability and Aggie Pride as well as valuing the Northern California lifestyle. These themes are woven into our 100-plus-year history and our reputation for solving problems related to food, health, the environment and society.

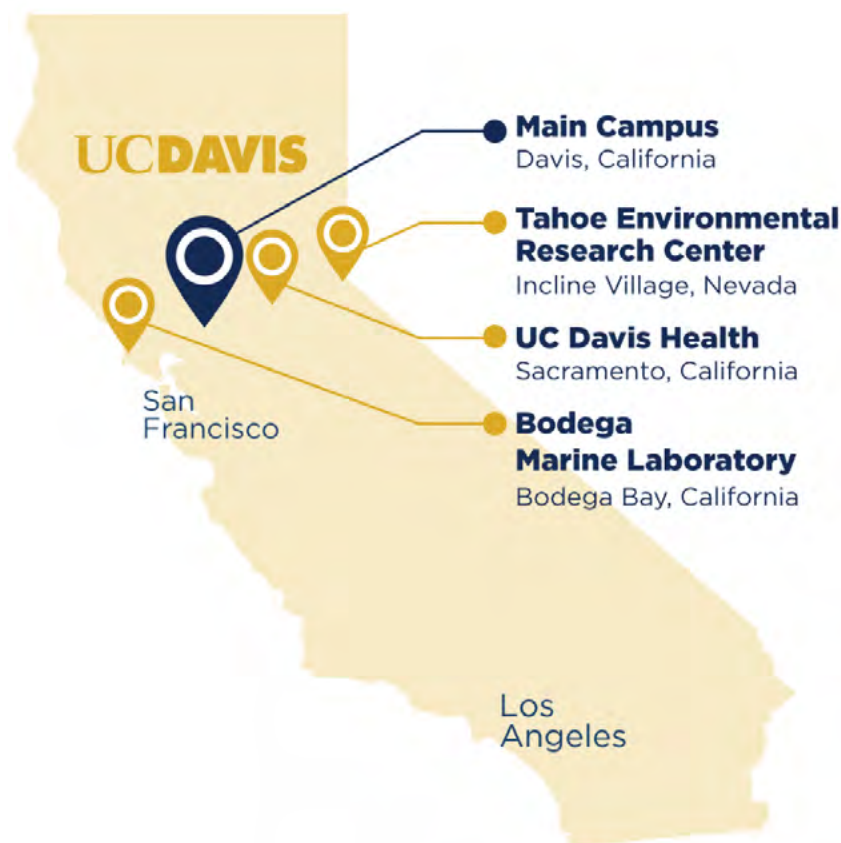

Our 5,300-acre campus borders the city of Davis, a vibrant college town of about 68,000 people living in Yolo County. The state capital is 20 minutes away, and world-class destinations such as the San Francisco Bay Area, Lake Tahoe and the Napa Valley are within a two-hour drive.

ABOUT UC DAVIS

ABOUT WIFSS

WHAT WE DO

The Western Institute for Food Safety and Security (WIFSS) is a University of California, Davis program of the School of Veterinary Medicine and the College of Agricultural and Environmental Sciences.

Since 2015, WIFSS has sponsored in-depth educational experiences for undergraduate, Ph.D. students, and faculty, to learn about the importance of applying a One Health approach to solving problems concerning food safety and security, and animal health. We have successfully sponsored One Health conferences for more than 500 participants including students and faculty from universities and vocational colleges throughout multiple provinces in China.

OUR MISSION

Our mission is to serve the global community by conducting research, developing training, and providing outreach programs that focus on safer, better quality food systems, water quality, and healthy animals, to safeguard the health and security of people, animals, and the environment.

WIFSS LEADERSHIP

**BENNIE I. OSBURN**

DVM, PhD, Dipl. ACVP

Director of Outreach and Training
Dean Emeritus, School of
Veterinary Medicine, UC Davis

**MICHELE JAY-RUSSELL**

DVM, MPVM, PHD, DIPL. ACVPM

Program Manager, Western
Center for Food Safety

CO-HOST*COLLEGE OF VETERINARY MEDICINE, CHINA AGRICULTURAL UNIVERSITY*

中國農業大學動物医学院
College of Veterinary Medicine, China Agricultural University

China Agricultural University (CAU) is one of the top-ranked comprehensive and national key universities in China, with 3 campuses situated at Haidian District in the western suburb of Beijing.

Since its founding in 1905, it has developed into one of the best agricultural universities in China and the world. CAU covers a broad spectrum in both natural and social sciences, with more than 70,000 students from 19 colleges studying in 72 undergraduate specialties, 149 MS programs, and 105 PhD programs.

With the motto of “To solve the problems of people’s livelihood, to educate the talent all over the world,” via and its continuous improvement in teaching and research work, CAU is dedicated to the advancement of agriculture, to the well-being of Chinese society, and to the development of the world.

Developer

OVERVIEW

ABOUT THE CONFERENCE

UC Davis-WIFSS One Health Conferences provide an in-depth educational experience for undergraduate students around the globe to learn about the importance of applying a One Health approach to solving specific, complex problems that arise at the interface of people, animals, and the environment. Our One Health for food systems conferences motivate talented international students to address important societal problems in veterinary, food systems, animal, agriculture, and engineering sciences. By using innovative, interactive, and student-centered learning experiences students learn the value of taking an interdisciplinary approach to solving complex real-world problems through problem-based learning activities which develop critical thinking skills, problem-solving abilities, and communication skills. This One Health approach to solving problems is critical in promoting progress towards safer, better quality food systems and healthy animals and people around the world.

- ✓ All-star faculty at UC Davis
- ✓ Multidisciplinary
- ✓ Multicultural participant
- ✓ International Young Scholars One Health Forum
- ✓ International Young Veterinary Forum

PAST SPEAKERS

MELISSA BAIN

Professor, Medicine and Epidemiology, School of Veterinary Medicine, University of California, Davis
DVM, University of Illinois College of Veterinary Medicine, Urbana, IL
MS, University of California School of Medicine, Davis, CA

Research Focus: Evaluating the effectiveness of prevention and treatment of problem behaviors, primarily in primarily companion animals, and the effects on the human-animal bond and humane care of animals.

BRIAN H. BIRD

Associate Director and Research Virologist, One Health Institute, Global Lead-Sierra Leone, PREDICT Project PI, PREEMPT
MPH, Johns Hopkins University
DVM and Ph.D. in Virology, University of California, Davis

Area of Focus: Leads Ebola-related surveillance activities as part of the USAID-funded PREDICT program led by UC Davis. He is co-principal investigator for the Defense Advanced Research Project Agency (DARPA)-funded Preventing Emerging Pandemic Threats (PREEMPT) project at UC Davis.

DANIELA BRUNO

Dairy Advisory, University of California Agriculture and Natural Resources; Cooperative Extension, Fresno California
Ph.D. and M.S. degrees in Agricultural and Resource Economics from UC Davis and her B.S. degree (summa cum laude) in Management Science from UC San Diego.

Research Focus: In her current role, Dr. Bruno is developing an extension program that focuses on policy issues relevant to California's agriculture and natural resources.

CHRIS BRUNNER

Communications and International Programs Director, Western Institute for Food Safety and Security

Area of Focus: Liaison for WIFSS international programs and marketing for WIFSS, serving as link between WIFSS and two major Chinese programs involving hundreds of graduate and undergraduate students, and vocational college faculty. Facilitates consortium connecting WIFSS, Nanjing Agricultural University, Massey University in New Zealand, and Wageningen University and Research, The Netherlands.

PAST SPEAKERS

DR. JAMES CULLOR

Professor Emeritus, Department of Population, Health and Reproduction, School of Veterinary Medicine, University of California, Davis
DVM, Kansas State University; Ph.D. in Comparative Pathology, University of California

Area of Focus: Works extensively throughout China talking to dairymen about how to maintain animal, public, and ecosystem health, and food safety. His research focus is mastitis, neonatal diseases, vaccines, novel antimicrobial compound development and testing, and studying novel methods for controlling pathogens in milk.

DR. SARAH DEPENBROCK

Assistant Professor, Medicine and Epidemiology, School of Veterinary Medicine, University of California, Davis
BS University of California, College of Biological Sciences, Davis, CA
DVM, University of California, School of Veterinary Medicine, Davis, CA
MS, The Ohio State University, Department of Veterinary Clinical Sciences

Research Focus: Pharmacokinetics of regional intravenous antimicrobial administration in livestock. Antimicrobial use and resistance in livestock, particularly as relates to bovine respiratory disease and calf management practices.

DR. ANDREA FASCETTI

Professor, Department of Molecular Biosciences, School of Veterinary Medicine, University of California, Davis
VMD, University of Pennsylvania, Philadelphia, PA
PhD, University of California, Davis

Research Focus: Nutrition and metabolism in companion animal; nutritional idiosyncrasies of the cat; mechanisms of obesity; amino acid, nutrient requirements in cats and dogs; improvement of pet foods; veterinary clinical nutrition-the use of nutrition in the management and prevention of disease.

DR. SARA GARCIA

Project Scientist, Western Institute for Food Safety and Security, University of California, Davis
B.S. in Genetics and Ph.D. in Integrative Pathobiology, University of California, Davis

Research Focus: Food safety, microbiology, and molecular genetics. Dr. Garcia has worked with academic and industry partners to influence best practices and guidelines for the application of technology in food safety and food systems.

PAST SPEAKERS

DR. CHIYU GUAN

Associate Professor, College of Animal Science and Technology & College of Veterinary Medicine, Zhejiang A&F University
DVM, Kansas State University

Research Focus: Food animal, companion animal of clinical veterinary medicine

DR. ILANA HALPERIN

Health Sciences Assistant Professor of Clinical Medicine & Epidemiology, University of California, Davis
DVM, University of California, Davis, California
CVA, International Veterinary Acupuncture Society

Research Focus: Certification in Veterinary Acupuncture - International Veterinary Acupuncture Society

DR. KATE HOPPER

Professor, Surgical & Radiological Sciences, School of Veterinary Medicine, University of California, Davis
BVSc, University of Melbourne, Australia
MVS, University of Melbourne, Australia
Ph.D., University of California, Davis

Research Focus: Primary care and preventive veterinary medicine

DR. KRISTINA HORBACK

Assistant Professor, Department of Animal Science, University of California, Davis
M.A. in Experimental Psychology, University of Southern Mississippi, 2011
Ph.D. in Experimental Psychology, University of Southern Mississippi, 2012

Research Focus: Identification of personality traits among domestic farm animals and evaluation of relationship between personality and the assessment of an animal's physical and psychological welfare.

PAST SPEAKERS

DR. MICHELE JAY-RUSSELL

Program Manager for the Western Center for Food Safety, University of California, Davis
DVM, University of California, Davis
Ph.D. in Comparative Pathology, University of California, Davis

Research Focus: Food safety, public health, molecular epidemiology of environmental enteric pathogens from domestic and wildlife species affecting people.

MS. HEATHER JOHNSON

Instructional Systems Designer, Western Institute for Food Safety and Security
MS in Microbiology, University of California, Davis

Areas of Focus: Oversees the instructional design component of WIFSS training and educational projects in accordance with certification standards that meet local, state and federal agency requirements. She designs blended - learning educational materials specifically using principles of adult education.

DR. LEI LEI

Associate Professor, College of Animal Science and Technology & College of Veterinary Medicine, Zhejiang A&F University
Ph.D., China Agricultural University

Research Focus: Antimicrobial resistance

DR. WENTAO LI

Professor, College of Animal Sciences & Technology / College of Veterinary Medicine, Huazhong Agricultural University
B.S., Sichuan Agricultural University
Ph.D., Huazhong Agricultural University
Ph.D., Utrecht University

Areas of Focus: Researches on coronavirus, including virus invasion, isolation of new viruses, research and development of new vaccines and therapeutic monoclonal antibodies

PAST SPEAKERS

DR. BO LIU

Associate Professor, College of Veterinary Medicine, China Agricultural University
DVM, Kansas State University

Areas of Focus: Cardiology

DR. JINXIN LIU

Professor, College of Animal Science and Technology, Nanjing Agricultural University
B.S., Northwest A&F University
Ph.D., Washington State University
Postdoc, University of California, Davis

Areas of Focus: Studies on intestinal microbial and bacterial resistance, including resistance groups in the gastrointestinal tract and milk of dairy cows and their environmental transfer.

DR. YANHONG LIU

Assistant Professor of Animal Nutrition, Department of Animal Science, University of California, Davis
B.S., China Agricultural University,
M.S. in Animal Nutrition, China Agricultural University
Ph.D. in Animal Science, University of Illinois, Urbana-Champaign

Research Focus: Antimicrobial resistance of food-borne bacteria; alternatives to antibiotics in agricultural animal industry; evaluation of low-cost by-products or co-products from feed or food industry as feed ingredients for pigs.

DR. ZHENMIN LIU

Ph. D, Professor,
Director of State Key Laboratory of Dairy Biotechnology
Dean of Bright Dairy Research Institute
Bright Dairy & Food Co., Ltd., Shanghai, China

Areas of Focus: New dairy processing technologies, cheese, fermented dairy products and functional dairy products.

PAST SPEAKERS

DR. MAELI MELOTTO

Associate Professor and Vice-Chair of Agricultural Plant Biology, Department of Plant Sciences, University of California, Davis
M.Sc. in Plant Physiology and Biochemistry, University of São Paulo, Brazil
Ph.D. in Plant Breeding and Genetics, Michigan State University

Research Focus: Plant-pathogen interactions, understanding the close interaction between plants and human pathogens at the molecular level.

DR. FRANK MITLOEHNER

Professor and Air Quality Extension Specialist, Department of Animal Science, University of California, Davis
M.S., Agricultural Engineering and Animal Science, University of Leipzig, Germany
Grad studies, Animal Science, University of Goettingen, Germany
Ph.D., Animal Science, Texas Tech University, Lubbock, TX

Research Focus: Air quality (dust emission and microbial sampling in feedlot cattle and pigs), environmental physiology (heat stress in cattle and pigs), and ethology.

DR. BENNIE OSBURN

Director, Outreach and Training, Western Institute for Food Safety and Security
Dean Emeritus, School of Veterinary Medicine, University of California, Davis
DVM, Kansas State University
Ph.D. in Comparative Pathology, University of California, Davis
Post-Doctoral Fellowship, Johns Hopkins Medical School

Research Focus: Infectious diseases of livestock, zoonotic diseases, including foodborne pathogens, and the ecology of infectious agents.

DR. CATHERINE OUTERBRIDGE

Professor, Department of Medicine and Epidemiology, School of Veterinary Medicine, University of California, Davis
DVM, Ontario Veterinary College, Guelph, Ontario, Canada
MVSc and residency in small animal internal medicine, University of Saskatchewan, Saskatoon, SK, Canada
Diplomate: American College of Veterinary Dermatology; and American College of Veterinary Internal Medicine in small animal medicine

Research Focus: Areas of interest include all aspects of clinical dermatology but she has a particular interest in cutaneous manifestations of systemic disease, metabolic skin diseases, infectious skin disease and antimicrobial resistance, and feline genodermatoses.

PAST SPEAKERS

DR. ZHONGLI PAN

Adjunct Professor, Department of Biological and Agricultural Engineering, University of California, Davis

Research Focus: Development of innovative food processing technologies to enhance food quality and safety of fruits, vegetables, grains, and nuts, as well as to improve the efficiency of food processes. Dr. Pan studies infrared heating technology for various food processes, including blanching, peeling, roasting, drying, disinfection and disinfestation. He also uses ultrasonic and pulsed electric field technologies for improving food processing efficiency.

DR. PRAMOD PANDEY

Associate Agronomist and Associate Specialist in Cooperative Extension, Department of Population Health and Reproduction, School of Veterinary Medicine, University of California, Davis; and Assistant Cooperative Extension Specialist, Food Science and Technology M.S., Washington State University, Pullman, and M. Tech. at Indian Institute of Technology, Kharagpur; Ph.D. from Iowa State University, Ames

Research Focus: Pathogenic bacteria transport at watershed-scale, in-stream and overland bacteria transport, watershed modeling, anaerobic digestion, renewable energy, water resources management, and rainwater harvesting.

DR. RICHARD PEREIRA

Assistant Professor, Department of Population Health and Reproduction, School of Veterinary Medicine, University of California, Davis
Externship, Washington State University, Veterinary Teaching Hospital, Pullman, WA
BVSc, Federal University of Uberlandia, Uberlandia, MG, Brazil; Intern, University of Florida, Gainesville, FL; Resident Certificate, Cornell University Hospital for Animals (CUHA), Ithaca, NY
Ph.D., Cornell University, College of Veterinary Medicine, Ithaca, NY

Research Focus: Food Animal Herd Health & Reproduction; Epidemiology; Antimicrobial Resistance.

DR. ROBERT POPPENG

Professor, California Animal Health and Food Safety Lab Molecular Biosciences, University of California, Davis
BS, Western Illinois University, Macomb, IL
DVM, University of Illinois, College of Veterinary Medicine, Urbana-Champaign, IL
PhD, University of Illinois, College of Veterinary Medicine, Urbana-Champaign, IL

Research Focus: Veterinary Clinical Toxicology, Diagnostic Veterinary Toxicology: Diagnostic testing methods for animal intoxications; wildlife toxicology; biomarker development to better define exposure to toxicants. Specialty Focus: Toxicology

PAST SPEAKERS

DR. JUAN PU

Professor of Animal Virology, Department of Preventive Veterinary Medicine, China Agricultural University
B.S., China Agricultural University
Ph.D., China Agricultural University

Research Focus: Epidemiological studies on animal influenza viruses, especially continuous studies on H9N2 subtype avian influenza viruses that have seriously endangered poultry populations in China; studies on the pathogenicity and cross-host transmission of influenza virus genes in search of viral virulence variants and molecular early warning signals of possible inter-mammalian epidemic.

DR. JORGE RODRIGUES

Professor, Department of Land, Air and Water Resources, University of California, Davis
M.Sc. in Microbiology, University of São Paulo, Brazil
Ph.D. in Crop and Soil Sciences and Environmental Toxicology, (Minor) Microbial Ecology (Dual Degree) - Michigan State University

Research Focus: Nature and ecology of microbial processes of importance in nature and of value to mankind; span from biological regulation of biogeochemical cycle and natural and agricultural ecosystems to microbial diversity and functionality in the hindguts.

DR. YONGYI SHEN

Professor, College of Veterinary Medicine, South China Agricultural University
Ph.D., The Chinese Academy of Sciences

Research Focus: Emerging infectious diseases and patho-ecology, such as the evolution of coronaviruses and avian flu viruses, the population evolution of viruses, first person who proposed that Malay pangolins carried a SARS-CoV-2-like virus.

DR. HOUHUI SONG

Dean, Professor, College of Veterinary Medicine, College of Animal Science and Technology, Zhejiang A&F University
Ph.D., Chinese Academy of Sciences

Research Focus: The pathogenic mechanism of gram-positive intracellular bacteria; zoonosis epidemiology and functional genomics; hygiene and safety of animal food; and research on the prevention and control mechanism of animal critical capsular virus.

PAST SPEAKERS

DR. DEMITRIA VASILATIS

Postdoc and T32 Fellowship recipient in Comparative Medicine, University of California Davis

DVM, College of Veterinary Medicine, University of Florida

Residency, Veterinary Medicine Teaching Hospital, University of California, Davis

Research Focus: Integrative Pathobiology

DR. WILLIAM VERNAU

Professor, Department of Pathology, Microbiology & Immunology, School of Veterinary Medicine, University of California, Davis

BSc, and BVMS, Murdoch University, Perth, Western Australia

DVSc, University of Guelph, Guelph, Ontario, Canada

PhD, University of California at Davis, Davis, CA, USA

Research Focus: Clinical, phenotypic and molecular characterization of hemic neoplasia in dogs and cats, some types of which mimic the behavior of their human counterparts and thus have additional comparative biomedical significance. General veterinary clinical pathology with an emphasis on veterinary hematology and cytology, particularly immunophenotyping and diagnostic immunocytochemistry, and the diagnostic assessment of cerebrospinal fluid.

LUXIN WANG

Associate Professor, Food Science and Technology, University of California, Davis

Ph.D. University of Missouri

Research Focus: Microbial safety of fresh produce, aquaculture products and animal products. Her program uses conventional microbiological technologies and new precision approaches, such as comparative genomics and metagenomics, to study the behavior of foodborne pathogens and their interactions with the background microbiome.

DR. YUNFEI XIE

Deputy Dean, Professor, College of Food Science and Technology, Jiangnan University

B.S., Jilin University

Ph.D., Jilin University

Research Focus: Food safety and quality control, including the development of methods and solutions of food safety on-site rapid detection, and the development of plant-derived preservatives and fruit and vegetable preservation research.

PAST SPEAKERS

DR. ZHEN YANG

Associate Professor, College of Veterinary Medicine, Nanjing Agricultural University
B.S., South China Agricultural University
DVM, University of Minnesota

Research Focus: Population Medicine of Swine and Cattle; Animal Epidemiology and cross-border animal infectious diseases.

DR. FENG YU

Associate Professor, College of Veterinary Medicine, China Agricultural University
DVM, University of California, Davis

Research Focus: Small animal internal medicine

DR. JIN ZHANG

Associate Professor, Department of Surgical & Radiological Sciences, School of Veterinary Medicine, University of California, Davis
BS, Anhui University, China
MS, Zhejiang University, China
PhD, Fudan University, China

Research Focus: Dr. Zhang studies the p53 family proteins and their targets and how these proteins contribute to tumor suppression and tumorigenesis in vitro and in vivo.

DR. LEI ZHOU

Associate Professor, Department of Preventive Veterinary Medicine, China Agricultural University
Postdoc, Virginia Tech

Research Focus: Molecular mechanism of RNA viral replication and pathogenesis, epidemiology of emerging or re-emerging viral disease and development of novel vaccines against swine viral disease.

PAST SPEAKERS

**DR. KUI ZHU**

Professor, Department of Basic Veterinary Medicine, China Agricultural University
Ph.D., University of Munich
Postdoc, Duke University

Research Focus: Research and development of new antibacterial drugs and synergist, improve the host-oriented antibacterial efficacy, development of probiotics antibacterial substitutes, to ensure human health and safety of animal-derived food.

OUR FRIENDS

CORE OBJECTIVES

Our conference is based on problem-based learning. Lectures, team-building exercises and field trips have been the cornerstone of our One Health Conference since 2015. The three-fold mission of our conference is to: raise awareness, encourage team building, and bring about change through calls to action.

We welcome students who participate in this online conference to come to a conference on the UC Davis campus when it is safe to travel.

RAISE AWARENESS

Awareness of the concept of One Health makes it clear that this multidisciplinary approach is essential to solving serious foodborne illness and security problems affecting the world's population.

TEAM BUILDING

Team building is encouraged during the conferences through collaborative group projects where problem-solving skills are put to the test.

CALL TO ACTION

Students are challenged to consider something they can do to help improve food safety, animal health or environmental problem which they identify in group discussions.

APPLICATION TO GRADUATE SCHOOL

Participation in the One Health Conference will increase your chances of getting into the university of your choice! The conference includes:

- ✓ U.S. Graduate School application workshop led by Director of DVM/PhD scholarship program
- ✓ Networking sessions with current graduate students at UC Davis
- ✓ Workshops on GRE/TOEFL requirement and preparing application materials
- ✓ Exceptional students can request a letter of recommendation from the conference founder, Dr. Bennie Osburn

GLOBAL PARTICIPATION

SUCCESS STORIES

BEYOND THE CONFERENCE

The One Health Conference has been a life-changing experience for many who have attended. Several past participants have gone on to continue their education and further their understanding of One Health at premiere universities around the world!

LU TAOTAO

- MPVM (Master of Preventive Veterinary Medicine)
- School of Veterinary Medicine UC Davis
- One Health Conference 2018

LU YANAN

- Master of Viticulture College of Agriculture and Life Sciences Cornell University
- One Health Conference 2018

PENG JINGWEN

- DVM (Doctor of Veterinary Medicine)
- School of Veterinary Medicine KSU
- One Health Conference 2016

TESTIMONIALS

“Through this conference, I learned teamwork was quite indispensable.”

- PEI TONGTONG

“In Davis, I saw the other way of teaching that is very different from the way of China, which is more like great communication between students, there is no right or wrong but “Good question.” It’s the new ability I learned in Davis that smiling to everything.”

- XU JIEV

“If we can’t ensure the safety of our food, then what else can we promise? I hope to see a world with safer food through our efforts.”

- CHEN HAO

“The program made me love science and scientific research. I want to use my power to create a better world.”

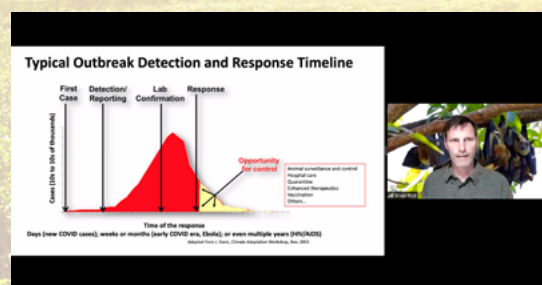

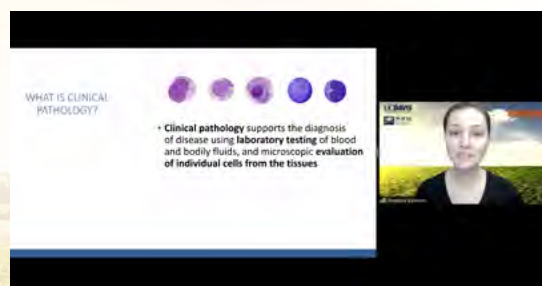

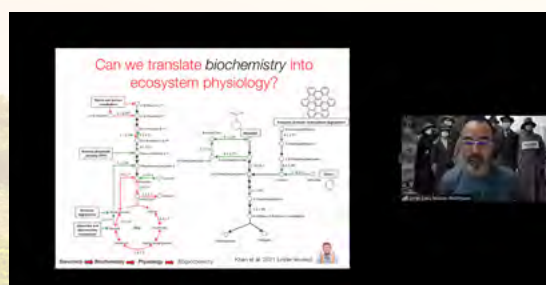

- XU YIFWEN

TEAM POSTERS

EXPERIENCE UC DAVIS
REGISTER TODAY!

APPLICATION

Fees & Expenses

Program Fee: \$2000

For students who have gotten a recommendation from their college

Scholarships can be up to \$600

Application Time

1 June 2021

Begin online application by college partners

15 June 2021

Begin online application on WIFSS website

19 July 2021

Application deadline

26 July 2021

One Health Winter Conference begins

Requirements

Minimum GPA: 2.8 (4.0)

English:

CET-4: 470 and above

CET-6: 430 and above

IELTS: 6.0 and above

TOEFL: 80 and above

If you do not meet one of the English requirements above, you can also attend an English interview with WIFSS to also be considered.

Suggested Majors

Veterinary Medicine

Animal Science

Food Science

Agriculture

Engineering

Public Health

Social Sciences

Economics

PROGRAM COORDINATORS

CHRIS BRUNNER

COMMUNICATIONS AND INTERNATIONAL PROGRAMS DIRECTOR

Chris Brunner is liaison for WIFSS international programs and manages communications and marketing for WIFSS. She serves as the connection between WIFSS and two major Chinese programs involving hundreds of graduate and undergraduate students, and vocational college faculty. She plays an important public relations role in the consortium linking WIFSS, Nanjing Agricultural University, Massey University in New Zealand, and Wageningen University and Research, The Netherlands. In her role as a leader in communications and marketing over the last 6 years, she helped advance the development of a new Website. She writes blogs for Breaking News, and the Newsletter, and actively promotes news about WIFSS research and programs on social media. She has been instrumental for WIFSS's programs receiving notoriety locally as well as internationally.

cmbrunner@ucdavis.edu

MICHAEL LUO

MS

EDUCATION SPECIALIST AND INTERNATIONAL PROGRAMS COORDINATOR

Michael Luo is affiliated with UC Davis Western Institute for Food Safety and Security. He has supported the Education Conferences for One Health for Food Safety and Security as assistant to the Conference Coordinator since 2015. Mr. Luo facilitates in Problem-based Learning team building exercises, and lectures on communication skills.

With an M.S. in Agriculture Extension Mr. Luo shares concepts on agricultural extension education with students attending the One Health conferences. In his career with WIFSS, Mr. Luo promotes the One Health concept on a global basis.

mikluo@ucdavis.edu

A large, white, spherical water tower stands against a clear, light blue sky. The tower is supported by a complex network of white metal beams. The words "UC DAVIS" are painted in large, dark blue, sans-serif capital letters across the middle of the sphere. A small red light is visible at the very top of the tower.
